

PROBIO

PROspection for BIOactive compounds in the North Sea

Matthias Sandra, VLIZ
(matthias.sandra@vliz.be)

2019/11 – 2022/10

Project partners: VIB, UGent, KU Leuven

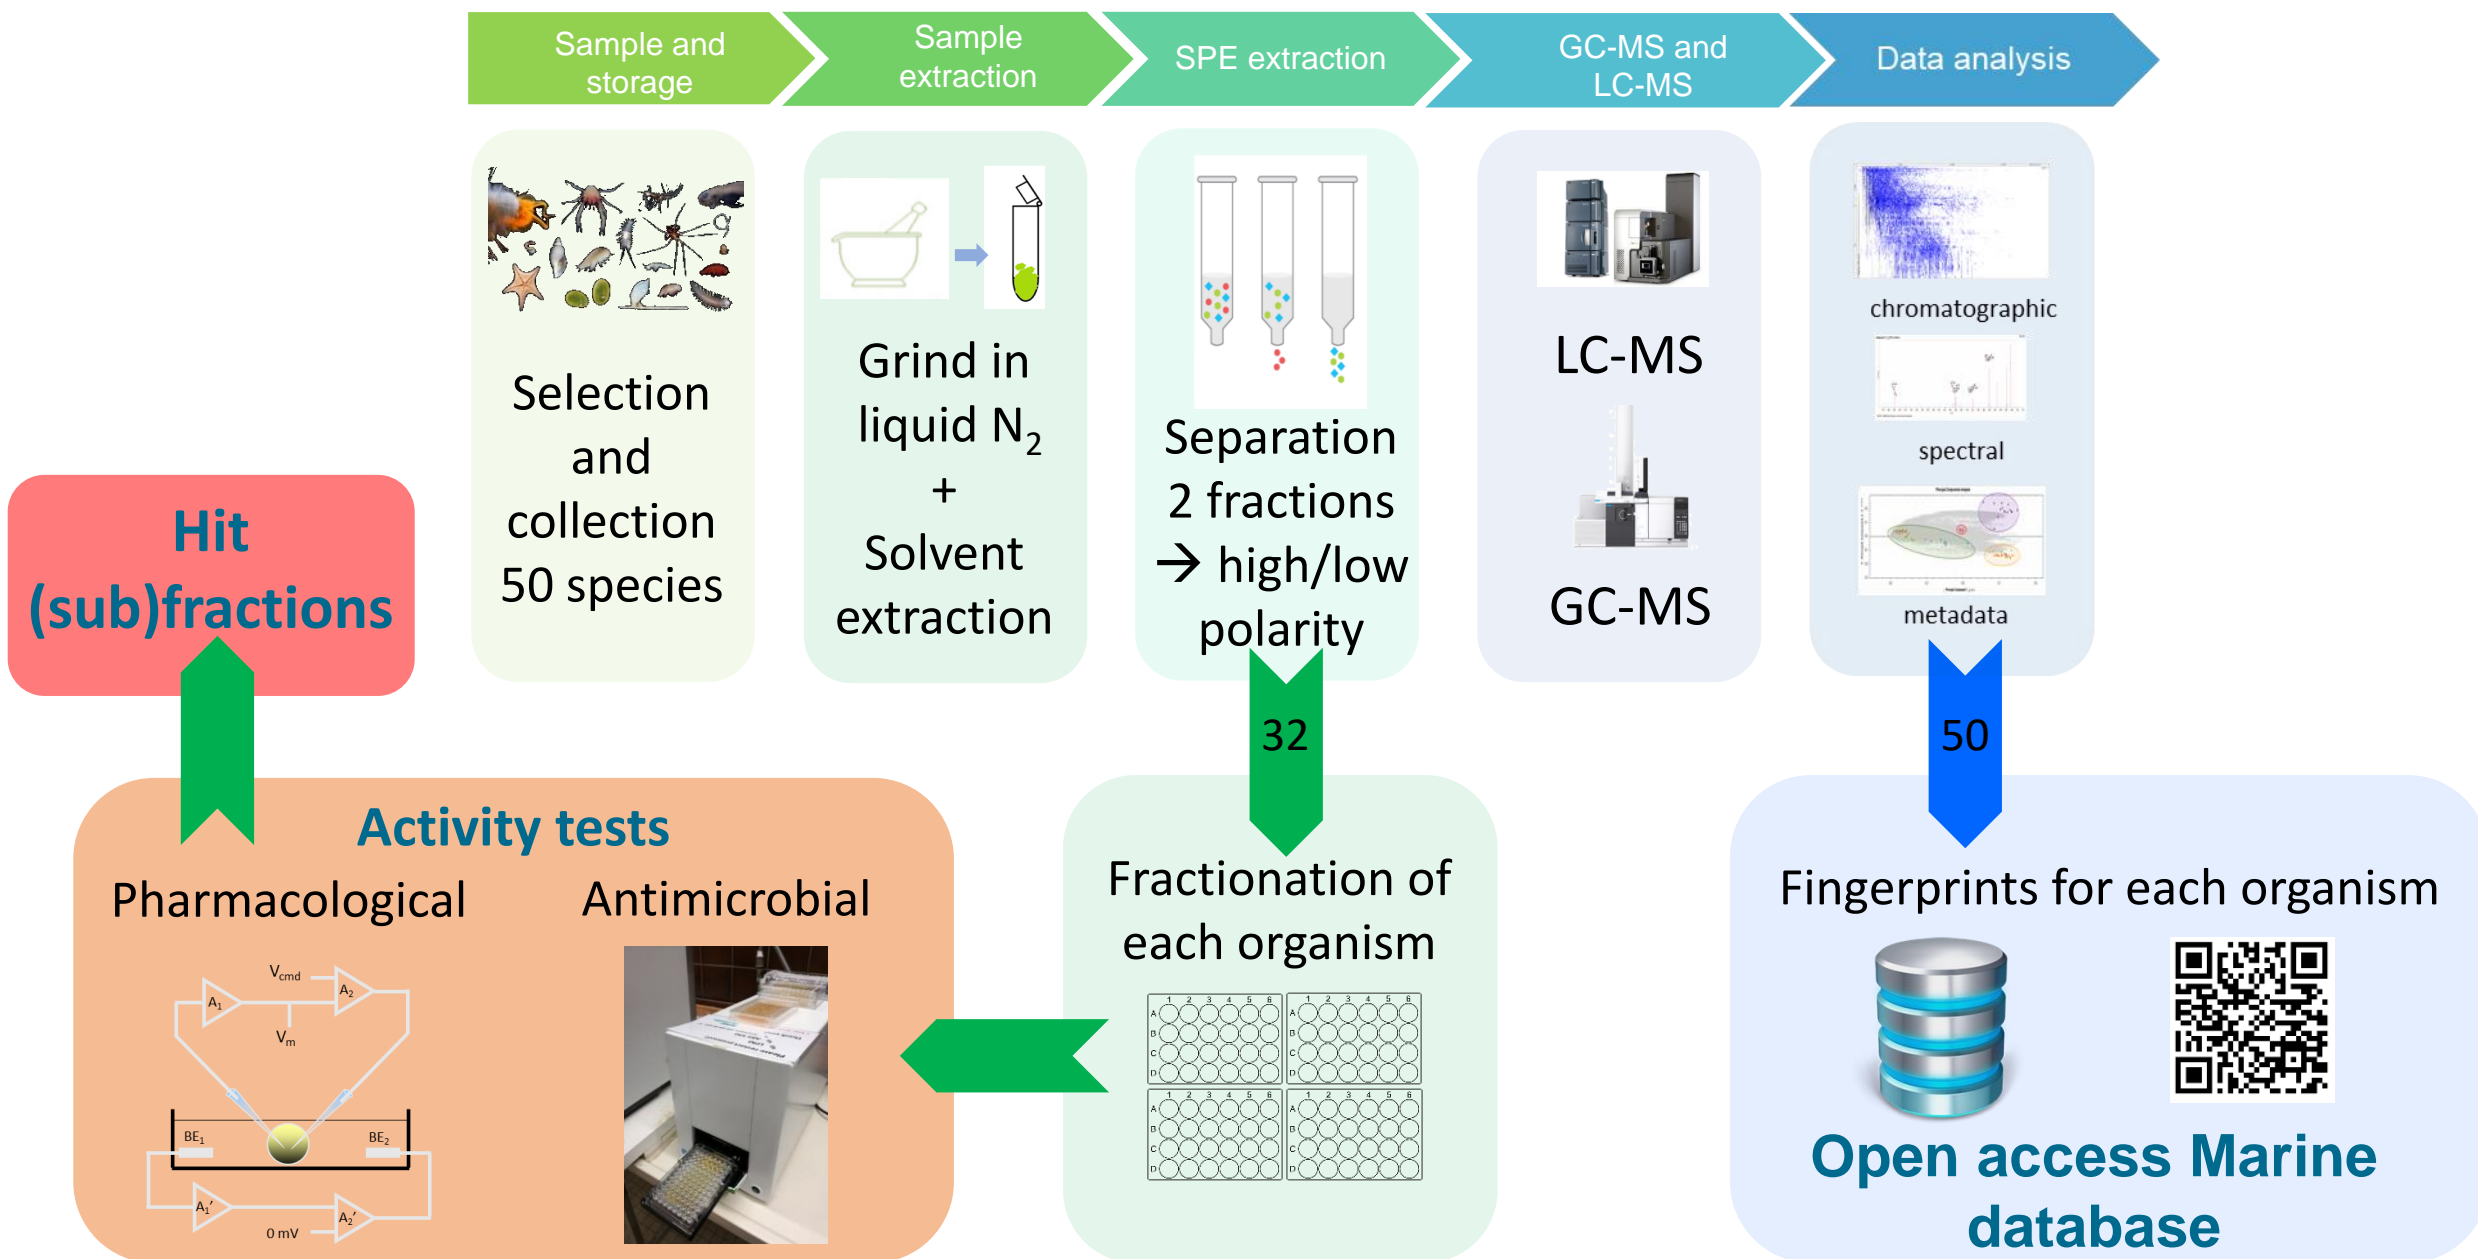

Funded by

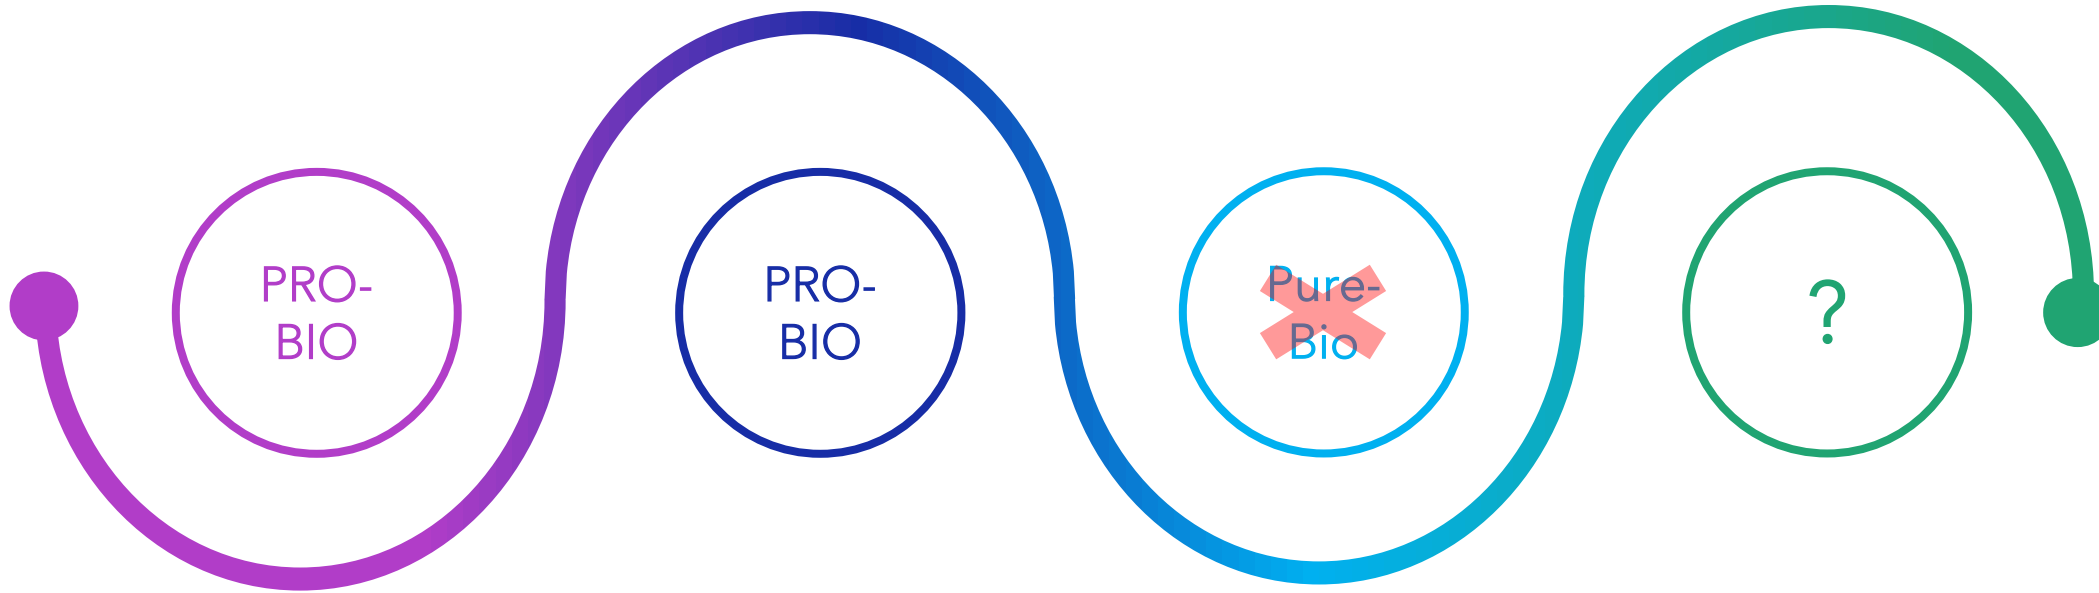

Facilitated by

High-throughput screening, Hit fractions and Open access Database

Roadmap and possible next steps

PLATFORM

For high-throughput screening of marine biological resources

HIT FRACTIONS

Short list of promising species and (sub)fractions with biological activity

PURIFICATION

Identification and purification active compounds in hit fractions

APPLICATION

Labs-scale validation of biological activity in industrial applications
